EXPERIMENT - 7

NAME : SIVA SWATHI M

ROLL NO : 240701522

Develop low-fidelity paper prototypes for a banking app and convert them into digital wireframes using Pencil Project

Aim:

To design low-fidelity paper prototypes for a banking application and convert them into digital wireframes using Pencil Project.

Tools Used:

- Pencil Project (https://pencil.evolus.vn/)
- Paper and Pencil (for initial sketches)

Features Identified:

The banking app includes the following core functionalities:

- User Login
- Account Dashboard (Balance C Transactions)
- Money Transfer
- Bill Payment

Procedure:

Step 1: Creating Low-Fidelity Paper Prototypes

1. Requirement Analysis:
   Identified key screens such as Login, Dashboard, and Transfer Money.
2. Sketching Layouts:
   Drew rough layouts on paper focusing on:
   - Input fields (Username, Password, Amount, IFSC)
   - Buttons (Login, Transfer, Pay Bill, Send Money, Cancel)
   - Display sections (Balance, Recent Transactions)
3. Refinement:
   Improved sketches based on clarity, usability, and logical flow between screens.

Step 2: Converting to Digital Wireframes (Pencil Project)

1. Project Setup:
   Created a new document in Pencil Project.
2. Screen Creation:
   Added multiple pages representing:
   - Login Screen
   - Dashboard Screen
   - Transfer Money Screen
3. Design Implementation:
   - Used shapes and stencils to create UI components.
   - Added:
     - Text fields for user inputs
     - Buttons for actions
     - Labels for clarity
4. Screen Design Details:

a) Login Screen:

- App Title (IOB Bank)
- Username and Password fields
- Login button

b) Dashboard Screen:

- Welcome message
- Account balance display (Rs. 25,000)
- Recent transactions (Sent C Received)
- Navigation buttons (Transfer, Pay Bill)

c) Transfer Money Screen:

- Recipient Name field
- Amount field
- IFSC Code field
- Action buttons (Send Money, Cancel)

5. Alignment C Layout:
   Ensured proper spacing, alignment, and readability of UI elements.
6. Navigation Linking:
   Connected screens using links:
   - Login → Dashboard
   - Dashboard → Transfer Screen
7. Annotations:
   Added notes to describe functionality of buttons and fields.
8. Exporting:
   Exported the final wireframes as images.

Result:

Low-fidelity paper prototypes were successfully created and converted into digital wireframes using Pencil Project. The application flow is clear, user-friendly, and demonstrates key banking functionalities.
